# BUDDED PECAN TREES

WIGHT NURSERY *and* ORCHARD CO.

J. B. WIGHT, Proprietor

CAIRO, GEORGIA

A PECAN TREE WITH A RECORD

## Price List Season 1923-24

---

## BUDEDDED PECAN TREES, SEASON OF 1923-1924

---

**T**HIRTY-SIX years' experience with the pecan has convinced me more and more of its profitableness. The demand for the best nuts is constantly increasing. Trees from fifteen to two hundred years old are annually producing their crops of nuts to the delight both of the palate and pocket-books of their owners. A grove once established, a pound of pecans can be grown more cheaply than a pound of cotton; and the grower has twelve months of the year in which to sell them, and the world for his market.

But if success is to come to the pecan grower, there are certain precautions that must be observed: (1) Strong and vigorous budded trees should be set of such varieties as are adapted to the section where they are to be grown. Avoid stunted trees, for a runt in the nursery will remain a dwarf in the grove. (2) Set trees only on the best land. (3) Cultivate, fertilize and care for them in the best manner. These are the three most important requisites to successful pecan growing either on a small or large scale. Observe them and you will not be disappointed.

### **SOME FACTS ABOUT MY TREES**

Great care is taken to send out only strong and vigorous trees, which are true to name.

My scions are taken from my own trees, which may be seen growing and fruiting in my groves.

Only strong and vigorous stocks are used for propagating purposes.

I have no agents but my bearing trees, my nursery stock, and my former customers. They speak for themselves.

A cordial invitation is extended to visit my nursery and orchards of 240 acres located near Cairo. To see is to learn.

All orders are accepted subject to weather and other conditions beyond my control.

---

## BUDDED PECAN TREES, SEASON OF 1923-1924

---

My experience is at the command of those who wish advice as to the best varieties to set in any particular section.

Cash orders receive first consideration. One-fourth of the purchase price should accompany all orders; and this is required on all C. O. D. shipments. If you want credit, give assurance of good faith, and furnish evidence of financial responsibility.

No trees held later than December 1st unless 25% of the price is paid before that date. Privilege is reserved of cancelling without notice all orders not thus provided for. If trees are to be held later than January 15th, payment in full is necessary, unless special arrangement to the contrary is made.

The prices given below are for strong, well-rooted trees, carefully packed and delivered to the express or railroad company at Cairo.

### PRICES 1923-1924

	1	10	100	1000
1 to 2 feet.....	\$ .70	\$ 6.00	\$ 50.00	\$ 400.00
2 to 3 feet.....	.90	8.00	70.00	650.00
3 to 4 feet.....	1.00	9.00	80.00	750.00
4 to 5 feet.....	1.15	10.00	90.00	850.00
5 to 6 feet.....	1.30	11.50	100.00	950.00
6 to 8 feet.....	1.60	13.50	125.00	1150.00
8 to 10 feet.....	1.90	16.50		

5 trees go at 10 rates, 50 at 100 rates, etc.

### VARIETIES

I am testing about forty of the most promising varieties of pecans. The following I consider among the best of these:

**Stuart** is an old favorite that has been widely tested. This is a safe variety to plant and succeeds over a wider territory than probably any other variety.

---

## BUDED PECAN TREES, SEASON OF 1923-1924

---

**Schley** is placed by some at the head of the list. It is a large, thin-shelled nut of fine flavor, and is well filled with meat. Liable to scab near the coast.

**Frotscher** is a large, thin-shelled nut, which has been widely planted. Placed by some at head of list of profitable varieties.

**Moneymaker** is an early and prolific bearer, and a healthy vigorous grower. It is proving a very profitable commercial variety.

**Success** is a nut of fine flavor. Originating in Mississippi, it has been widely disseminated during the last few years.

**Pabst** is a safe nut; and while not quite so large as some of the above, yet it is a good bearer, and one can hardly make a mistake in setting it.

**Nelson** is probably the largest pecan grown. It is a strong, vigorous grower, and an early and prolific bearer. Its shell is thick.

Can also furnish **Moore, Mobile, Alley, and Delmas** in limited quantities.

If in doubt as to the best varieties to set, this, when left to me, will receive my careful attention, thus insuring a better selection than an inexperienced grower could make for himself.

The transplanting season extends from the middle of November to the early part of the following March. Other things, however, being equal the earlier in the season trees are set the better and more promptly they grow off the following season.

I have a few "Rush" and "Wiltz Mayette" English walnuts budded on black walnut stock. These are worth testing. Price \$1.00 each.

Address all orders and communications to

J. B. WIGHT, Cairo, Georgia
